

Roberto André Mossi Milla

Full-Stack Software Engineer | Product Development | Cloud Applications

mossiroberto0392@gmail.com | +1 (814) 790-1591 | linkedin.com/in/andre-mossi-803765236/ | github.com/AndreM222

Summary

Full-Stack Software Engineer experienced in delivering secure, production-facing web and cross-platform applications. Builds end-to-end systems across frontend interfaces, backend services, databases, authentication, cloud storage, and CI/CD. Brings additional depth in AI-enabled workflows, computer vision, and data processing for healthcare, insurance, and industrial applications.

Experience

Ingeniería Digital

May 2026 – Present

Software Engineer

Honduras

- Designed and delivered full-stack healthcare workflows for post-surgical medical reporting, owning application architecture across React, Next.js, TypeScript, PostgreSQL, Auth0, AWS S3, and document-processing services.
- Built secure document-management features for upload, retrieval, versioning, review, and collaborative editing, supporting reliable handling of professional healthcare records.
- Developed client and administrative interfaces for a vehicle-assessment platform using React, Next.js, TypeScript, PostgreSQL, AWS S3, Shadcn/UI, and Konva-based visual annotation tools.
- Implemented Playwright-based data collection services to retrieve, normalize, and validate vehicle information from external sources for downstream business workflows.
- Improved delivery consistency through GitHub Actions, Husky, ESLint, Prettier, Commitizen, and automated quality checks across application repositories.
- Integrated AI services, OCR, and computer-vision capabilities into existing user-facing workflows while preserving human review and operational control.

NOIR

Jan. 2026 – Present

Founder & Software Engineer (In Development)

Remote

- Designing and developing a cross-platform movie discovery and continuity platform for Apple devices using SwiftUI and modern platform-native application patterns.
- Architecting Rust services with Axum, PostgreSQL, Redis, authentication, and cloud-based infrastructure to support metadata aggregation, availability tracking, and synchronization.
- Own product and engineering decisions from interface design and data modeling through backend implementation, testing workflows, internationalization, and deployment planning.

Dinant

Jun. 2023 – Jul. 2023

Full-Stack Developer

Honduras

- Developed database-backed internal workflow features using Oracle SQL, JavaScript, HTML, and CSS, contributing to data modeling, reporting, filtering, and application delivery.

Gannon University

Aug. 2024 – May 2025

Computer Vision Engineer — Industry-Sponsored Project

Erie, PA

- Built full-stack components for an industrial traceability system, integrating YOLO object-detection events with event-driven services, TimescaleDB, Docker, and operational dashboards.
- Developed data persistence and monitoring interfaces that made real-time detection data accessible to downstream production workflows.

Gannon University

Aug. 2024 – May 2025

Research Assistant — Evolutionary Artificial Intelligence

Erie, PA

- Conducted faculty-supervised research on multi-agent learning with NeuroEvolution of Augmenting Topologies (NEAT), resulting in a peer-reviewed ASEE publication and Sigma Xi presentation.
- Developed GPU-accelerated simulations in Unreal Engine using C++, CUDA, and PyTorch.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, SwiftUI, HTML, CSS, Shadcn/UI, Konva

Backend & Data: Node.js, Rust, Axum, REST APIs, PostgreSQL, Redis, Oracle Database, SQL, Auth0

Cloud & Delivery: AWS S3, Docker, GitHub Actions, Git, CI/CD, Playwright, Linux, ESLint, Prettier

Languages: TypeScript, JavaScript, Python, Rust, C++, SQL, Java, Bash

Applied AI: OpenAI APIs, Amazon Textract, OCR, multimodal AI, computer vision, YOLO

Education & Recognition

Gannon University

2025

B.S. Computer Systems Engineering

Erie, PA

- Peer-reviewed publication with the American Society for Engineering Education (ASEE); research presentation at Sigma Xi.
