

Roberto André Mossi Milla

Software Engineer | Systems & Infrastructure | Backend Development

mossiroberto0392@gmail.com | +1 (814) 790-1591 | linkedin.com/in/andre-mossi-803765236/ | github.com/AndreM222

Summary

Systems-oriented Software Engineer with experience designing backend services, data-backed applications, containerized workflows, CI/CD practices, and production AI pipelines. Builds reliable software across Rust, Python, TypeScript, SQL, Docker, PostgreSQL, cloud storage, and event-driven services. Brings additional experience in computer vision, GPU-accelerated simulation, and end-to-end application delivery.

Experience

Ingeniería Digital

May 2026 – Present

Software Engineer (AI Systems)

Honduras

- Architected secure, database-backed services for healthcare document workflows, integrating Next.js, TypeScript, PostgreSQL, Auth0, AWS S3, OCR processing, and structured report generation.
- Designed document-ingestion and processing workflows supporting upload, OCR extraction, cloud persistence, retrieval, version management, and user review of clinical records.
- Built data-acquisition services with Playwright to collect, normalize, and validate vehicle information from external sources for insurance workflows.
- Maintained automated engineering standards through GitHub Actions, Husky, ESLint, Prettier, Commitizen, and lint-staged, improving consistency across repositories.
- Delivered client and administrative applications backed by PostgreSQL and AWS S3, integrating AI and computer-vision services without coupling core business workflows to model output.

NOIR

Jan. 2026 – Present

Founder & Software Engineer (In Development)

Remote

- Architecting a Rust backend using Axum, PostgreSQL, Redis, authentication, and cloud-based services for a cross-platform movie discovery application.
- Designing services for metadata aggregation, availability tracking, synchronization, and client access across native applications.
- Owning system design, data modeling, deployment planning, automated testing workflows, internationalization, and cross-platform integration.

Gannon University

Aug. 2024 – May 2025

Computer Vision Engineer — Industry-Sponsored Project

Erie, PA

- Built components of an industrial traceability platform using Dockerized services, event-driven computer-vision pipelines, TimescaleDB, and operational dashboards.
- Integrated vision events with persistent time-series storage and monitoring interfaces, improving operational visibility across interconnected services.

Gannon University

Aug. 2024 – May 2025

Research Assistant — Evolutionary Artificial Intelligence

Erie, PA

- Developed GPU-accelerated multi-agent simulations in Unreal Engine using C++, CUDA, and PyTorch, requiring performance-conscious engineering and experimentation workflows.
- Conducted research on evolutionary AI with NEAT; co-authored peer-reviewed ASEE research and presented results at Sigma Xi.

Dinant

Jun. 2023 – Jul. 2023

Full-Stack Developer

Honduras

- Developed data-backed internal workflow features using Oracle SQL, JavaScript, HTML, and CSS, contributing to database design, reporting, filtering, and business-process automation.

Technical Skills

Systems & Backend: Rust, Axum, Node.js, REST APIs, PostgreSQL, Redis, TimescaleDB, Oracle Database, SQL, event-driven services

Infrastructure & Delivery: Docker, Linux, AWS S3, GitHub Actions, Git, CI/CD, CMake, Husky, ESLint, Prettier, Commitizen

Languages: Rust, C++, Python, TypeScript, JavaScript, SQL, Java, Bash

Applied Systems: OCR pipelines, Amazon Textract, Playwright, authentication, cloud storage, computer vision, CUDA, PyTorch

Education & Recognition

Gannon University

2025

B.S. Computer Systems Engineering

Erie, PA

- Peer-reviewed publication with the American Society for Engineering Education (ASEE); research presentation at Sigma Xi.
