氏名 Mossi Milla Roberto Andre

■ 職務要約

After joining my intern at Dinant. I worked as a full-stack developer for 2 months crating web applications, managing databases, planning projects, and selling products to various companies that Dinant works with. I used agile development methodology to develop projects which met all the stakeholders current and future requirements. By working as a manager on multiple projects, I gained knowledge as a product manager, database manager, front-end, and back-end developer.

■ 活かせる経験・知識・技術

- I learned how to be a product manager by scheduling meetings with stakeholders to listen to their concerns so after the meeting I would plan and make web applications meant to assist them.
- Developed web applications both for companies and personal projects using NextJS, Vite, Apex-Oracle, OracleDB, JavaScript, React, HTML, and CSS.
- Acquired data science skills by managing databases with Oracle and making predictions through data visualization using Power BI.
- I developed my business knowledge by pitching products to the stakeholders and convincing them that our products meet their current and future needs.

■ 職務経歴

2023年6月～2023年7月 Dinant 会社		
事業内容：Food Manufacturing: Manufacturing of snacks, edible oils, food products, etc. Agricultural Operations: Agricultural activities like palm oil production. Consumer Product Manufacturing: Manufacturing of personal and household products such as soaps and cleaning agents. Brands: The company manages brands like Mazola (edible oils), Yumitos (Snacks), and more. 資本金：Undisclosed 売上高：Specific revenue figures have not been disclosed, but the following economic impacts have been reported for the period of 2021-2022 : ・ 賃金：\$80 million ・ 地元のパーム生産者への支払い：\$120 million ・ 地元のプランテン生産者への支払い：\$24 million ・ 所得税：\$8 million ・ 輸出額：\$340 million ・ 従業員数：Approximately 7860 上場：Unlisted Company	Worked As Intern	
2023年6月～2023年7月／ Legal Document Generator and Stock Management	開発環境	規模
【プロジェクト概要】 I developed a. legal document generator tool to help companies create new contracts through the web application with their business partners. When the client wanted to take or return a device from the company, then they required to make custom documents and sign them in person for liability, but this process took a lot of time to process and search through the inventory. So for this I developed a web application which both can create documents custom to their needs, sign them, and as well keeps track of both the clients and products history for future reference.	【ツール】 Power BI 【言語】 HTML CSS Oracle Apex JavaScript	3 Persons Leader

【担当フェーズ】 • Requirements Definition • Planning • Designing • Development • Integration Testing • Operation and Maintenance 【業務内容】 • Data Collection • Planning • Design • Development • Stakeholder Meetings • Idea Proposal and Sales • Implementation and Deployment • Data Visualization 【実績・取り組み】 • Independently developed a large-scale project for a stakeholder and acquired skills in various areas withing the company. • I designed flexible and maintainable code to be able to respond to new needs that may arise in the future.	【OS】 Windows 【DB】 Oracle	
2023 年 6 月～2023 年 7 月／ Product Overseer	開発環境	規模
【プロジェクト概要】 Worked with overseas stakeholders to develop a web application that allows various departments within their company to share information about the operating status, and condition of products and machines. 【担当フェーズ】 • Requirements definition • Basic Design • Detailed Design • Development • Integration Testing • Operation and Maintenance 【業務内容】 • Data Collection • Planning • Design • Development • Business trips and Meeting with Clients • Idea Proposals and Sales • Implementation • Data Visualization	【ツール】 Power BI 【言語】 HTML CSS Oracle Apex JavaScript 【OS】 Windows 【DB】 Oracle	1 Person Leader

【実績・取り組み】 - Improved business and communication skills through interactions with various companies outside of our own. - Designed flexible and maintainable code to meet new needs that may arise in the future.		
2023 年 6 月～2023 年 7 月 Gannon University		
事業内容：Gannon University is a private catholic university offering undergraduate and graduate programs in a variety of fields, including engineering, health sciences, business, and humanities. It offers a comprehensive education that integrates liberal arts and professional learning. 資本金：Not Disclosed 売上高：Not Disclosed 従業員数：Not Disclosed 上場：Unlisted Company	Worked As Research Assistant	
2023 年 6 月～2023 年 7 月／ AITagSandbox	開発環境	規模
【プロジェクト概要】 I developed a AI which plays a game of tag. Using Genomes and a modified version of the NEAT algorithm, the AI entities develop complex neuron connections through evolution and reinforced learning to solve complex tasks. The purpose was to study the application of biology principles into AI for future AI development. 【担当フェーズ】 - Requirements Definition - Basic Design - Detailed Design - Development - Integration Testing - Presentation 【業務内容】 - Data Collection - Planning - Design - Development - Implementation and Presentation 【実績・取り組み】 - I learn how artificial intelligence is developed and how it can be trained and applied for different situations. Just as well to contribute new ideas to technology development. - I developed a project in which brings new perspectives and applied it into a complex problem like making it play a game of tag with the same limits as humans.	【言語】 C++ CMake Cuda Unreal Engine LaTeX 【OS】 Windows MacOS	1 Person Leader

■ テクニカルスキル

種類		使用期間	レベル
OS	Windows	10 Years, 4 Months	Environment design and setup
	Ubuntu Linux	1 Year	Environment design and setup
	MacOS	5 Months	Environment design and setup
	Arch Linux	2 Years, 3 Months	Environment design and setup
	Manjaro Linux	1 Year, 2 Months	Environment design and setup
	Proxmox	3 Months	Environment design and setup
言語	PowerShell	4 Years, 2 Months	Code writing, direction and revision
	Bash	3 Years, 2 Months	Code writing, direction and revision
	C++	8 Years, 2 Months	Code writing, direction and revision
	C	1 Year, 4 Months	Basic programming
	C#	1 Year, 2 Months	Basic programming
	Unity	5 Months	Basic programming
	Unreal Engine	7 Years, 11 Months	Code writing, direction and revision
	Python	5 Months	Basic programming
	React	1 Year, 3 Months	Basic programming
	HTML	3 Years, 6 Months	Code writing, direction and revision
	CSS	3 Years, 6 Months	Code writing, direction and revision
	JavaScript	3 Years, 6 Months	Basic programming
DB	SQL	5 Months	Code writing, direction and revision
	JSON	2 Years, 1 Months	Code writing, direction and revision
	Oracle	2 Months	Code writing, direction and revision

■ 資格

August 2023	(Honduras) Driver License
May 2022	(Extreme Networks) Introduction to Future Networks
December 2022	(Harvard University) CS50' s Introduction to Computer Science

■ 自己 PR

<Ability to Explore, Improve, and Learn>

As I started my career, I have both corporate and personal projects. Through these experiences I developed various skills going from management to development. As a Full-Stack Developer at Dinant, I was in charge of many areas like pitching ideas, developing web applications, and so on. Because of my enjoyment in the career I had also developed open-sourced projects in GitHub which are used by people and as well they contribute with ideas and features.

As I am trying to move to Japan, I know that my skills in verbal communication are lacking. To improve this, I tried having conversation with my Japanese friends only using Japanese, and during one of my visits to Japan I went to café's situated around Japan to ask people if I could join them and practice my Japanese.

<Ability to Continue Learning>

I was first exposed to the world of programming at the age of 14 after watching a video about game development in my computer class. That video inspired to develop my own game and even participated in a technology competition held at my school. Since I was alone, I learned various skills needed for game development like 3D and 2D modeling, animation, and so on. I kept getting better and developed a second game at 18 years old.

Because of all these experiences I wanted to keep learning of what it means to be a programmer and studied at Gannon University the major of Computer Science. As well as adventure to develop various projects which touched different areas of programming like Web-Development, AI development, and more.

On May 2024 I started studying Japanese by myself and still studying every day. I do it with the hopes of working in Japan and contribute to develop further the technology being used as of today.

以上
