

Roberto André Mossi Milla

Software Engineer | AI Systems | Full-Stack Development

mossiroberto0392@gmail.com | +1 (814) 790-1591 | linkedin.com/in/andre-mossi-803765236/ | github.com/AndreM222

Summary

Software Engineer specializing in production AI systems, full-stack applications, and ML-enabled workflows. Builds end-to-end products that combine LLMs, computer vision, OCR, cloud services, and reliable backend architecture for healthcare, insurance, and industrial automation. Published AI researcher with experience in multimodal systems, reinforcement learning, and production software delivery.

Experience

Ingeniería Digital

May 2026 – Present

Software Engineer (AI Systems)

Honduras

- Designed and deployed an AI-assisted medical documentation platform that automates post-surgical report workflows by combining OCR extraction, LLM-assisted editing, structured document generation, and cloud storage.
- Architected secure full-stack services for document upload, retrieval, versioning, and collaborative review using React, Next.js, TypeScript, PostgreSQL, Auth0, and AWS S3.
- Built OCR pipelines with Amazon Textract and OpenAI APIs to transform unstructured clinical records into structured, reviewable medical documentation.
- Developed an AI vehicle-damage assessment workflow combining multimodal AI, computer vision, VIN-history retrieval, and image analysis to support vehicle valuation and claims decisions.
- Implemented Playwright data-acquisition services and Konva annotation tools, enabling normalized vehicle data collection and human validation of AI-assisted damage assessments.
- Maintained delivery standards through GitHub Actions, Husky, ESLint, Prettier, Commitizen, and automated checks across client and administrative applications.

Gannon University

Aug. 2024 – May 2025

Research Assistant — Evolutionary Artificial Intelligence

Erie, PA

- Conducted faculty-supervised research on autonomous multi-agent learning with NeuroEvolution of Augmenting Topologies (NEAT), investigating emergent behavior in dynamic environments.
- Developed GPU-accelerated reinforcement-learning simulations in Unreal Engine using C++, CUDA, and PyTorch.
- Co-authored peer-reviewed ASEE research and presented findings at a Sigma Xi conference hosted by Penn State University.

Gannon University

Aug. 2024 – May 2025

Computer Vision Engineer — Industry-Sponsored Project

Erie, PA

- Built components of an industrial traceability system using YOLO object detection, event-driven services, TimescaleDB, Docker, and monitoring dashboards.
- Integrated computer-vision events with persistent storage and operational interfaces, improving visibility into detection data and downstream production workflows.

Dinant

Jun. 2023 – Jul. 2023

Full-Stack Developer

Honduras

- Developed database-backed business workflow features using Oracle SQL, JavaScript, HTML, and CSS, contributing to data modeling, reporting, filtering, and internal application delivery.

Selected Project

NOIR

Jan. 2026 – Present

Founder & Software Engineer (In Development)

Remote

- Designing and developing a cross-platform movie discovery and continuity platform using SwiftUI and a Rust backend built around Axum, PostgreSQL, Redis, and cloud-based services.
- Architecting backend services for movie metadata aggregation, availability tracking, authentication, and synchronization; planned AI assistance is limited to focused movie-search queries.

Technical Skills

Languages: Python, C++, Rust, TypeScript, JavaScript, SQL, Java, Bash

AI / ML: LLM APIs, multimodal AI, prompt engineering, computer vision, OCR, YOLO, PyTorch, CUDA, NEAT, reinforcement learning

Application Engineering: React, Next.js, Node.js, REST APIs, SwiftUI, PostgreSQL, Oracle Database, Auth0, Playwright, Konva

Cloud / DevOps: AWS S3, Amazon Textract, Docker, GitHub Actions, Git, CMake, Linux, CI/CD, ESLint, Prettier

Education & Recognition

Gannon University

2025

B.S. Computer Systems Engineering

Erie, PA

- Peer-reviewed publication with the American Society for Engineering Education (ASEE); research presentation at Sigma Xi.
